-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 1-3 are objected to because of the following informalities:

Claim 1 lines 1 and 2, claim 2 line 1 and claim 3 line 1; the phrase "USB cable" has an error. Examiner suggests "universal serial bus cable" instead to avoid indefinite rejection for use of acronym.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen (US006733333B1).

Re claim 1, Chen discloses an illuminating USB cable assembly comprising: a length of cable (cable portion of 20) comprising at least one elongate conductive member (inherent in cable, also see column 2 line 17 according to the numbering in the middle) having opposite ends; and first and second plugs (connectors 21) connected to opposite ends of the cable, the first plug (21) comprising: a casing (housing 25) made of

light-transmitting material and mounted to an end of the cable with the end of the at least one elongate conductive member extending into the casing (see figure 2), a contact member (on 23 for example) mounted to the casing and electrically connected to the elongate conductive member, and an illuminating element (LED 24) electrically connected to the contact member by a resistor (inherent on 23 for example), said illuminating element being a light emitting diode; wherein when a signal travels through the cable, the illuminating element gives off light that transmits through the light-transmitting casing for providing a visual indication to an operator (see abstract).

Re claim 3, Chen discloses an illuminating cable assembly, wherein the second plug (21) is connectable with a computer input/output device (see figure 4 and column 2 lines 38-39).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen in view of Garside (US005797771).

Re claim 2, Chen substantially discloses a cable assembly as set forth in claim 1 above. Chen does not explicitly disclose wherein the second plug (13) is different from the first plug in external specifications. However, Garside teaches of wherein the second plug is different from the first plug in external specifications (see figure 1). It

would have been obvious to one having ordinary skill in the art at the time the invention was made to use the second plug that is different from the first plug in external specifications of Garside on the assembly of Chen in order to provide connections to differently shaped receptacles.

Response to Arguments

6. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

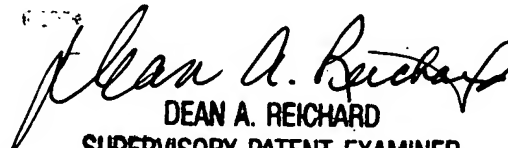

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinhee J. Lee whose telephone number is 571-272-1977. The examiner can normally be reached on M, T, Th and F at 6:30AM-5PM.
